Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

# PROCEEDINGS

OF THE

# ROYAL SOCIETY OF LONDON.

*From June* 6, 1867, *to June* 18, 1868, *inclusive.*

VOL. XVI.

LONDON:
PRINTED BY TAYLOR AND FRANCIS,
RED LION COURT, FLEET STREET.
MDCCCLXVIII.

# CONTENTS.

## VOL. XVI.

Page

Description of an Apparatus for the Verification of Sextants, designed and constructed by Mr. T. Cooke, and recently erected at the Kew Observatory. By Balfour Stewart, LL.D. ..... 2

On the Observations made with a Rigid Spectroscope, by Captain Mayne and Mr. Connor of H.M.S. 'Nassau,' on a Voyage to the Straits of Magellan. By J. P. Gassiot, F.R.S. ..... 6

On some Elementary Principles in Animal Mechanics. By the Rev. Samuel Haughton, M.D., F.R.S. ..... 19

Observations on the Anatomy of the Thyroid Body in Man. By George W. Callender ..... 24

On the Physical Constitution of the Sun and Stars. By G. Johnstone Stoney, M.A., F.R.S., F.R.A.S. ..... 25

Researches on the Hydrocarbons of the Series $C^nH^{2n+2}$.—No. III. By C. Schorlemmer ..... 34

Researches into the Chemical Constitution of Narcotine and of its Products of Decomposition.—Part II. By A. Matthiessen, F.R.S., and G. C. Foster, B.A. ..... 39

On the Chemical Intensity of Total Daylight at Kew and Pará in 1865-67. By Henry E. Roscoe, F.R.S. ..... 41

On the Elimination of Nitrogen during Rest and Exercise on a regulated Diet of Nitrogen. By E. A. Parkes, M.D., F.R.S. ..... 44

Note on the Lunar-diurnal Variation of Magnetic Declinaton. By J. A. Broun, F.R.S. ..... 59

An Account of Observations on the great Nebula in Orion, made at Birr Castle, with the 3-feet and 6-feet Telescopes, between 1848 and 1867. By Lord Oxmantown ..... 60

On the apparent relation of the Nerves to the Muscular Structures in the Aquatic Larva of *Tipula crystallina* of De Geer. By Richard L. Maddox, M.D. ..... 61

On the Identity of the Body in the Atmosphere which decomposes Iodide of Potassium with Ozone. By Thomas Andrews, M.D., F.R.S. ..... 63

Page

On the Anatomy of *Balænoptera rostrata*, Fab. By Alexander Carte, M.A., M.D., F.R.C.S.I., F.L.S., M.R.I.A., &c., and Alexander Macalister, M.D., L.R.C.S.I., Demonstrator of Anatomy, Royal College of Surgeons, Ireland, &c. ..... 64

On the Distribution of the Fibres in the Muscular Tunics of the Stomach in Man and other Mammalia. By James Bell Pettigrew, M.D. ..... 65

On a Self-acting Apparatus for multiplying and maintaining Electric Charges, with applications to illustrate the Voltaic Theory. By Sir W. Thomson, F.R.S. ..... 67

Note on the Calculus of Chemical Operations. By Professor Williamson. 72

Inferences and Suggestions in Cosmical and Geological Philosophy.—Second Series.—On the Luminous Atmosphere of the Sun, exterior to the Photosphere; and on the Probability that the Monochromatic Spectra from which Mr. Huggins has inferred the Gaseous Constitution of certain Nebulæ, are due in reality to the Luminous Atmospheres of their constituent Stars or Suns. By E. W. Brayley, F.R.S., F.R.A.S., Professor of Physical Geography and Meteorology in the London Institution ..... 72

On the Colouring and Extractive Matters of Urine.—Part I. By Edward Schunck, F.R.S. ..... 73

On the Colouring and Extractive Matters of Urine.—Part II. By Edward Schunck, F.R.S. ..... 126

On a Crystalline Fatty Acid from Human Urine. By Edward Schunck, F.R.S. ..... 135

On Oxalurate of Ammonia as a Constituent of Human Urine. By Edward Schunck, F.R.S. ..... 140

On a New Class of Bodies Homologous to Hydrocyanic Acid.—I. By A. W. Hofmann, LL.D., F.R.S. ..... 144

On a New Series of Bodies Homologous to Hydrocyanic Acid.—II. By A. W. Hofmann, LL.D., F.R.S. ..... 148

On a New Series of Bodies Homologous to Hydrocyanic Acid.—III. By A. W. Hofmann, LL.D., F.R.S. ..... 150

Second Supplementary Paper on the Calculation of the Numerical Value of Euler's Constant. By William Shanks, Houghton-le-Spring, Durham.. 154

Addition to Memoir on the Resultant of a System of Two Equations. By A. Cayley, F.R.S. ..... 156

Contributions to the History of Methylic Aldehyde. By A. W. Hofmann, LL.D., F.R.S. ..... 156

On the New Reflecting Telescope to be used at Melbourne, Australia. By the Rev. Dr. Robinson, F.R.S. ..... 159

Copy of a Despatch addressed to Her Majesty's Secretary of State for Foreign Affairs by the British Consul at Canea, Crete, giving an account of an Earthquake which took place in that Island ..... 162

Page

Anniversary Meeting:

Report of Auditors ..... 163
List of Fellows deceased ..... 163
———— elected since last Anniversary ..... 163
Address of the President ..... 164
Presentation of the Medals ..... 174
Election of Council and Officers ..... 180
Financial Statement ..... 181 & 182
Changes and present state of the number of Fellows ..... 183

Observations on the Anatomy of the Thyroid Body in Man. By George W. Callender, Lecturer on Anatomy at St. Bartholomew's Hospital ..... 183

On some Alterations in the Composition of Carbonate-of-Lime Waters, depending on the influence of Vegetation, Animal-Life, and Season. By Robert Warington, F.R.S., F.C.S. ..... 189

Results of Observations of Atmospheric Electricity at Kew Observatory, and at Windsor, Nova Scotia. By Joseph D. Everett, D.C.L., F.R.S.E. 195

On the Orders and Genera of Quadratic Forms containing more than three Indeterminates. By H. J. Stephen Smith, M.A., F.R.S., Savilian Professor of Geometry in the University of Oxford.—Second Notice ..... 197

On the Special Action of the Pancreas on Fat and Starch. By Horace Dobell, M.D. &c., Physician to the Royal Hospital for Diseases of the Chest &c. ..... 209

On a supposed Connexion between the Amount of Rainfall and the Changes of the Moon, being an extract of a Letter from J. H. N. Hennessey, Esq., First Assistant on the Great Trigonometrical Survey of India, to General Sabine, R.A., Pres. R.S. ..... 213

Researches conducted for the Medical Department of the Privy Council at the Pathological Laboratory of St. Thomas's Hospital. By J. L. W. Thudichum, M.D. ..... 215

The Bakerian Lecture.—Researches on Vanadium.—Part I. By Henry E. Roscoe, B.A., F.R.S. ..... 220

On the Conditions for the existence of Three Equal Roots, or of Two Pairs of Equal Roots of a Binary Quartic or Quintic. By A. Cayley, F.R.S.. 229

The Caudal Heart of the Eel a Lymphatic Heart.—Effect of the force with which the lymph-stream is propelled therefrom on the flow of blood in the Vein into which the heart opens.—Explanation of the appearance of blood propelled in successive drops, as if from the heart, along the Caudal Vein.—Influence which the force of the lymph-stream from the heart exerts in accelerating and promoting the flow of blood in the Caudal Vein. By Thomas Wharton Jones, F.R.S., Professor of Ophthalmic Medicine and Surgery in University College, London, Ophthalmic Surgeon to the Hospital, &c. ..... 230

Notices of some Parts of the Surface of the Moon, illustrated by Drawings. By John Phillips, M.A., D.C.L., F.R.S., F.G.S., Professor of Geology in the University of Oxford ..... 231

Page

Contributions towards determining the Weight of the Brain in the different Races of Man. By Joseph Barnard Davis, M.D. ..... 236

Description of a Hand Spectrum-Telescope. By William Huggins, F.R.S. 241

Remarks upon *Archæopteryx lithographica*. By Prof. T. H. Huxley, LL.D., F.R.S. ..... 243

Account of Experiments on Torsion and Flexure for the Determination of Rigidities. By Joseph D. Everett, D.C.L., Professor of Natural Philosophy in Queen's College, Belfast, F.R.S. ..... 248

Comparison of Magnetic Disturbances recorded by the Self-registering Magnetometers at the Royal Observatory, Greenwich, with Magnetic Disturbances deduced from the corresponding Terrestrial Galvanic Currents recorded by the Self-registering Galvanometers of the Royal Observatory. By George Biddell Airy, Astronomer Royal, F.R.S. ..... 249

On the Mysteries of Numbers alluded to by Fermat.—Second Communication. By the Right Hon. Sir Frederick Pollock, Bart., F.R.S. ..... 251

Compounds Isomeric with the Sulphocyanic Ethers.—I. On the Mustard-oil of the Ethyl-series. By A. W. Hofmann, LL.D., F.R.S. ..... 254

Sur l'Origine de l'Électrotone des Nerfs. Par M. Ch. Matteucci ..... 258

On the Resistance of the Air to the Motion of Elongated Projectiles having variously formed Heads. By the Rev. F. Bashforth, B.D., Professor of Applied Mathematics to the Advanced Class of Artillery Officers, Woolwich. 261

On the Resistance of the Air to Rifled Projectiles. By J. A. Longridge, C.E. ..... 263

On the Theory of Probability, applied to Random Straight Lines. By M. W. Crofton, B.A., of the Royal Military Academy, Woolwich, late Professor of Natural Philosophy in the Queen's University, Ireland..... 266

On Governors. By J. Clerk Maxwell, M.A., F.R.SS.L. & E. ..... 270

Proceedings of the Council of the Royal Society with reference to the undertaking of certain Physical Observations in India..... 283

Notes on the Chemical Geology of the Gold-fields of California. By J. Arthur Phillips ..... 294

Third Supplementary Paper on the Calculation of the Numerical Value of Euler's Constant. By William Shanks ..... 299

Transformation of the Aromatic Monamines into Acids richer in Carbon.—II. On Menaphthoxylic Acid, the Naphthaline-term corresponding to Benzoic Acid. By A. W. Hofmann, LL.D., F.R.S. ..... 300

On the Relation of Form and Dimensions to Weight of Material in the Construction of Iron-clad Ships. By E. J. Reed, Chief Constructor of the Navy ..... 306

On the Amount and Changes of the Polar Magnetism at certain positions in Her Majesty's Iron-built and Armour-plated Ship 'Northumberland.' By Frederick John Evans, F.R.S., Staff-Captain R.N., in charge of the Admiralty Magnetic Department ..... 311

Page

Report of the Committee on the Melbourne Telescope to the President and Council of the Royal Society ..... 313

On the Geographical and Geological Relations of the Fauna and Flora of Palestine. By the Rev. Henry Baker Tristram, M.A., F.G.S. ..... 316

New Researches on the Dispersion of the Optic Axes in Harmotome and Wöhlerite, proving these Minerals to belong to the Clinorhombic (Oblique) System. By M. A. L. O. Des Cloiseaux ..... 319

On the Law of the Resistance of the Air to Rifled Projectiles. By Charles W. Merrifield, F.R.S., Principal of the Royal School of Naval Architecture ..... 321

Remarks on the Great Nebula in Orion. In a Letter addressed to Prof. G. G. Stokes, Sec. R.S. By W. Lassell, F.R.S. ..... 322

Observations on the Development of the Semilunar Valves of the Aorta and Pulmonary Artery of the Heart of the Chick. By Morris Tonge, M.A., M.D. ..... 329

On the Phenomena observed to attend the propulsion of Lymph from one of the Lymphatic Hearts into a Vein in the Frog. By Thomas Wharton Jones, F.R.S., Professor of Ophthalmic Medicine and Surgery in University College, &c. ..... 335

Researches on Solar Physics. Heliographical Positions and Areas of Sunspots observed with the Kew Photoheliograph during the years 1862 and 1863. By Warren De La Rue, Ph.D., F.R.S., F.R.A.S., Balfour Stewart, LL.D., F.R.S., F.R.A.S. (Superintendent of the Kew Observatory), and Benjamin Loewy, F.R.A.S. ..... 336

The Specific Heat of Mixtures of Alcohol and Water. By A. Dupré, Ph.D., Lecturer on Chemistry at the Westminster Hospital, and F. J. M. Page. 336

Researches on the Blood.—On the Action of Nitrites on the Blood. By Arthur Gamgee, M.D., F.R.S.E., Assistant to the Professor of Medical Jurisprudence in the University of Edinburgh ..... 339

Microscopical characters of the rhythmically contractile Muscular Coat of the Veins of the Bat's Wing, of the Lymphatic Hearts of the Frog, and of the Caudal Heart of the Eel. In three parts.—Part I. Microscopical characters of the rhythmically contractile Muscular Coat of the Veins of the Web of the Bat's Wing. Part II. Microscopical characters of the rhythmically contractile Muscular Coat of the Lymphatic Hearts of the Frog. Part III. Microscopical characters of the rhythmically contractile Muscular Coat of the Caudal Heart of the Eel. By Thomas Wharton Jones, F.R.S., Professor of Ophthalmic Medicine and Surgery in University College, &c. ..... 342

On Waves in Liquids. By W. J. Macquorn Rankine, C.E., LL.D., F.R.S. 344

Scientific Exploration of Central Australia. By Dr. G. Neumayer ..... 347

On some New Derivatives of Acetone. By Maxwell Simpson, M.D., F.R.S. 364

Researches on the Hydrocarbons of the Series $C_n H_{2n+2}$.—No. IV. By C. Schorlemmer ..... 367

Researches on the Hydrocarbons of the Series $C_n H_{2n+2}$.—No. V. By C. Schorlemmer ..... 372

Page

On the Constitution of Capryl Alcohol from Castor-oil. By C. Schorlemmer ..... 376

Announcement of the intention of the Swedish Government to send out a new Polar Expedition. In a Letter addressed to the President, by Prof. A. E. Nordenskiöld ..... 381

Further Observations on the Spectra of the Sun, and of some of the Stars and Nebulæ, with an attempt to determine therefrom whether these Bodies are moving towards or from the Earth. By William Huggins, F.R.S. ..... 382

On the Spectrum of Brorsen's Comet, 1868. By William Huggins, F.R.S. 386

Memoir on "Undevelopable Uniquadric Homographics." By Martin Gardiner, C.E. ..... 389

A Comparison of the Kew and Lisbon Magnetic Curves during the Magnetic Storm of February 20–25, 1866. By Senhor I. Brito Capello, of the Lisbon Observatory ..... 399

On Supersaturated Saline Solutions. By Charles Tomlinson, F.R.S..... 403

On the Impact of Compressible Bodies, considered with reference to the Theory of Pressure. By R. Moon, M.A., Honorary Fellow of Queen's College, Cambridge ..... 411

On the Tides of Bombay and Kurrachee. By William Parkes, M. Inst. C.E. 414

Observations of the Spectra of some of the Southern Nebulæ. By Lieut. John Herschel, R.E. ..... 416

On the Combustion of Hydrogen and Carbonic Oxide in Oxygen under great pressure. By E. Frankland, F.R.S, Professor of Chemistry in the Royal Institution and in the Royal School of Mines ..... 419

On the Occlusion of Hydrogen Gas by Metals. By Thomas Graham, F.R.S., Master of the Mint ..... 422

On the Osteology of the Solitaire or Didine Bird of the Island of Rodriguez, *Pezophaps solitaria* (Gmel.). By Alfred Newton, M.A., Professor of Zoology and Comparative Anatomy in the University of Cambridge, and Edward Newton, M.A., Auditor-General of Mauritius ..... 428

Description of the great Melbourne Telescope. By the Rev. T. R. Robinson, D.D., F.R.S., and Thomas Grubb, F.R.S. ..... 434

A Contribution to the Knowledge of Persulphide of Hydrogen. By A. W. Hofmann, LL.D., F.R.S. ..... 437

Note on the Anatomy of the Blood-vessel System of the Retina of the Hedgehog. By J. W. Hulke, F.R.S. ..... 439

Researches on Refraction-Equivalents. By J. H. Gladstone, Ph.D., F.R.S. 439

A Third Memoir on Skew Surfaces, otherwise Scrolls. By Prof. Cayley, F.R.S. ..... 444

Transformation of the Aromatic Monamines into Acids richer in Carbon.—III. On Menaphtylamine. By A. W. Hofmann, LL.D., F.R.S..... 445

Account of some recent Observations on Sun-spots, made at the Kew Observatory. By Warren De La Rue, F.R.S., Balfour Stewart, F.R.S., and Benjamin Loewy, F.R.A.S. ..... 447

Page

The Formation and Early Growth of the Bones of the Human Face. By George W. Callender, Lecturer on Anatomy at St. Bartholomew's Hospital..... 447

On a Method of making a Direct Comparison of Electrostatic with Electromagnetic Force; with a Note on the Electromagnetic Theory of Light. By J. Clerk Maxwell, F.R.SS.L. & E. ..... 449

Results of Examination of Southern Nebulæ with the Spectroscope. By Lieut. J. Herschel ..... 451

Notes on Variations in the origin of the Long Buccal Branch of the Fifth Cranial Nerve. By Wm. Turner, M.B. (Lond.), Professor of Anatomy, University of Edinburgh ..... 456

Description of a Pendulum-Electrograph now in use at the Melbourne Observatory. By R. L. J. Ellery, Government Astronomer to the Colony of Victoria ..... 458

Further particulars of the Swedish Polar Expedition. In a Letter addressed to the President, by Prof. A. E. Nordenskiöld..... 464

An attempt to apply Chemical Principles in explanation of the Action of Poisons. By W. H. Broadbent, M.D. ..... 465

On the Communication of Vibration from a Vibrating Body to a surrounding Gas. By G. G. Stokes, M.A., Sec. R.S., Fellow of Pembroke College, and Lucasian Professor of Mathematics in the University of Cambridge ..... 470

An Account of certain Experiments, on Aneroid Barometers, made at Kew Observatory, at the expense of the Meteorological Committee. By B. Stewart, F.R.S. ..... 472

Contributions to Terrestrial Magnetism, No. XI. By General Sabine, R.A., P.R.S., &c. ..... 480

On the Spectrum of Comet II., 1868. By William Huggins, F.R.S..... 481

Variations in Human Myology observed during the Winter Session of 1867–68 at King's College, London. By John Wood, F.R.C.S., Examiner in Anatomy to the University of London ..... 483

On an Easy Method of measuring approximately the Intensity of Total Daylight. By Roger J. Wright, Esq. ..... 525

Obituary Notices of Deceased Fellows:

Dr. Benjamin Guy Babington ..... i
William Thomas Brande ..... ii
Dr. William Brinton ..... vi
Walter Crum ..... viii
